ABSTRACT

Enrollment information for the State of Connecticut State Technical Colleges is presented, based on official enrollment reports submitted by colleges during the 1985-86 academic year. First, report highlights are presented, including: (1) full-time equivalent (FTE) counts tended to be higher than headcount enrollments, indicating that the average technical college student was taking more than 15 credit hours per term; (2) nearly 85% of the students within the tuition fund (which corresponds roughly to the day division) attended on a full-time basis; (3) women constituted nearly one-fifth of the enrollment, though 1985 saw a decline in the proportion of women enrolled, reversing a 5-year general trend; (4) over 66% of the degree students enrolled in electrical engineering, data processing, or mechanical engineering programs; (5) the average extension fund student carried just under five credit hours per term; (6) electrical engineering and data processing accounted for nearly half of the headcount for associate degree programs within the extension fund; (7) only 3% of all students were enrolled in certificate programs; (8) enrollment of students in pre-technical programs was less than 1%; (9) the average tuition fund attrition rate from fall to winter term was 12.1%, while the extension fund attrition rate was 25.7%; and (10) minority enrollment was higher in the tuition fund (14.5%) than in the extension fund (8.9%). The bulk of the report consists of data tables and graphs. A graduate placement report is appended. (EJV)

ACKNOWLEDGEMENTS

Information and assistance in preparing this report came from a large number of people. In particular, I would like to recognize the prodigious efforts of Jane Toce, of the Central Office, who collected and verified all the data, acted as coordinator with the five colleges, organized and supervised the process of moving from data to information. Judy McCarroll, also of the central office, undertook the task of computerizing the development of this report, including the use of graphics. I wish also to acknowledge the contributions and assistance of the administrative and clerical staffs of the colleges for the numerous hours spent compiling and typing data.

Kathleen Curtin, Temp. Personal Secretary, C.O.
Cynthia Domurat, Administrative Aide, C.O.
Sheila Johnson, Personal Secretary, C.O.
Jean Kinnane, Personal Secretary, C.O.
Carrie Landry, Clerk Typist, C.O.
Ken McBride, Mgr. of Computer Svs. and Data Designee, WSTC
Diane Minardo, former Registrar and Data Designee, TVSTC
Peter Moanfeldt, Dean of Instruction and Data Designee, GNHSTC
Richard Olson, Dean of Instruction and Data Designee, NSTC
Rita Smith, Registrar and Data Designee, HSTC

Director, System Research and Planning
March 1987

SUMMARY

This compilation of data was prepared using the official enrollment reports submitted by the colleges during the 1985-86 academic year.

TUITION FUND

- As in past years, within the tuition fund, FTE counts tend to be higher than headcount enrollments, indicating that the average technical college student is taking more than 15 credit hours per term (Tables 1.1 and 1.2).

- Nearly 85 percent of students within the tuition fund (roughly corresponding to day division) attend on a full-time basis. Over the past five years part-time tuition fund students accounted for between 13.5 percent and 16.8 percent of headcount enrollment. (Table 1.3).

- The proportion of full-time students across the five colleges is fairly constant, varying from a low of 81.4 percent to a high of 89.3 percent (Table 1.4).

- Women now constitute nearly one-fifth of our enrollment. This varies from 11.5 percent at Hartford State to 20.9 percent at Thames Valley State (Table 1.5).

- System-wide, 1985 saw a decline in the proportion of women enrolled, reversing a five-year general trend (Table 1.6).

- Enrollment is drawn almost entirely from residents of Connecticut (Table 1.7).

- System-wide, the faculty-student ratio averaged 1:15.3. Excluding GNHSTC, whose low faculty-student ratio reflects changes in their facilities, the average is slightly over 1:16 (Table 1.8).

- Over two-thirds of our degree students are enrolled in three technologies: electrical engineering, data processing, and mechanical engineering (Table 1.9)

- Students enrolled in certificate programs account for three percent of total enrollment (Table 1.9).

- Students enrolled in pre-technical programs account for approximately ten percent of total enrollment (Table 1.9).

- The CAD program increased enrollment by nearly 150 percent over 1984. Another, smaller, program in chemical technology experienced a two-thirds increase in enrollment from 1984 to 1985. Decreasing demand in data processing led to a one-quarter decline. Electro-mechanical engineering, a much smaller program, lost one-third of its enrollment during this period (Table 1.10).

- Women constitute over one-quarter of the enrollment in five degree programs: data processing, fire technology, chemical engineering, chemical technology and computer systems (Table 1.11).

- The term-to-term decline in enrollments over the academic year continues to be the pattern for the system (Figures 1.1, 1.2, Table 1.13).

EXTENSION FUND

- The average extension fund student carries just under five credit hours per term, or approximately one-third the load of a standard full-time equivalent student (Tables 2.1 and 2.2).

- Within the extension fund two technologies account for nearly half of the headcount for associate degree courses: electrical engineering and data processing. The addition of mechanical engineering, manufacturing engineering and industrial management means that five programs account for 80 percent of headcount (Table 2.3).

- As in the tuition fund, only three percent of all students are enrolled in certificate programs (Table 2.3).

- Enrollment of students in pre-technical programs is insignificant in the extension fund--less than one percent (Table 2.3).

- Among programs with enrollments of at least 100 students, four had changes of 20 percent or more: industrial management (+47 percent), data processing (-36 percent), fire technology (-26 percent) and mechanical engineering (-22 percent) (Table 2.4).

- Enrollments continue a four-year decline (Table 2.6).

- The pattern of term-to-term enrollments is somewhat different from the tuition fund. In the extension fund enrollments decline between fall and winter and then rise between winter and spring, although generally not rising as high as the initial fall enrollments (Table 2.6, Figure 2.1, 2.2).

TUITION FUND PLUS EXTENSION FUND

- Enrollments are not evenly divided among the five colleges. Waterbury State has the largest share (27 percent) and Greater New Haven State the smallest (13 percent) (Table 3.1).

- Headcount students declined about one-fifth between fall and winter, and rose slightly between winter and spring (Table 3.1).

- The drop in FTE enrollment from fall to winter is smaller than headcount declines, indicating that those students who continue carry heavier loads in the winter term. The obverse is true for the comparison from winter to spring (Table 3.1 and 3.2).

- Combining both full- and part-time students, the "average" student carries 11 contact hours and 9.6 credit hours (Tables 3.1, 3.2 and 3.3).

- The average tuition fund attrition rate from fall term to winter term was 12.1. However, attrition at one college, Waterbury State, was significantly lower (7.1 percent) than the others, which ranged from 12.0 to 14.2 percent (Table 3.5).

- The average extension fund attrition rate from fall to winter was 25.7 percent, varying from a low of 16.2 percent to a high of 51.2 percent (Table 3.5).

- Attrition averaged 19.4 percent from fall to winter, with a low of 12.7 percent and a high of 30.4 percent (Table 3.5).

- Attrition rates were lowest from winter to spring. In fact, enrollments rose at all institutions an average of 4.2 percent (Table 3.5).

- Overall attrition from fall to spring was 16.0 percent, ranging from a low of 7.2 percent to a high of 25.5 percent (Table 3.5).

- Minority enrollment was highest in the tuition fund (14.5 percent), 8.9 percent for the extension fund, and 11.6 percent for the combined funds (Table 3.7).

- Median student age in the tuition fund was in the 20-24 age group, compared to 25-29 in the extension fund. In the tuition fund 8.8 percent of all students are 30 or over, compared to 40.7 percent in the extension fund (Table 3.8).

- Enrollments of minority students have generally risen for the period of fall 1982 through fall 1985. In fall 1985 Black students constituted 5.5 percent of the student body, Native Americans 0.3 percent, Asians 2.9 percent, and Hispanics 2.9 percent (Table 3.9).

Totals	3737	2777	3221	9735

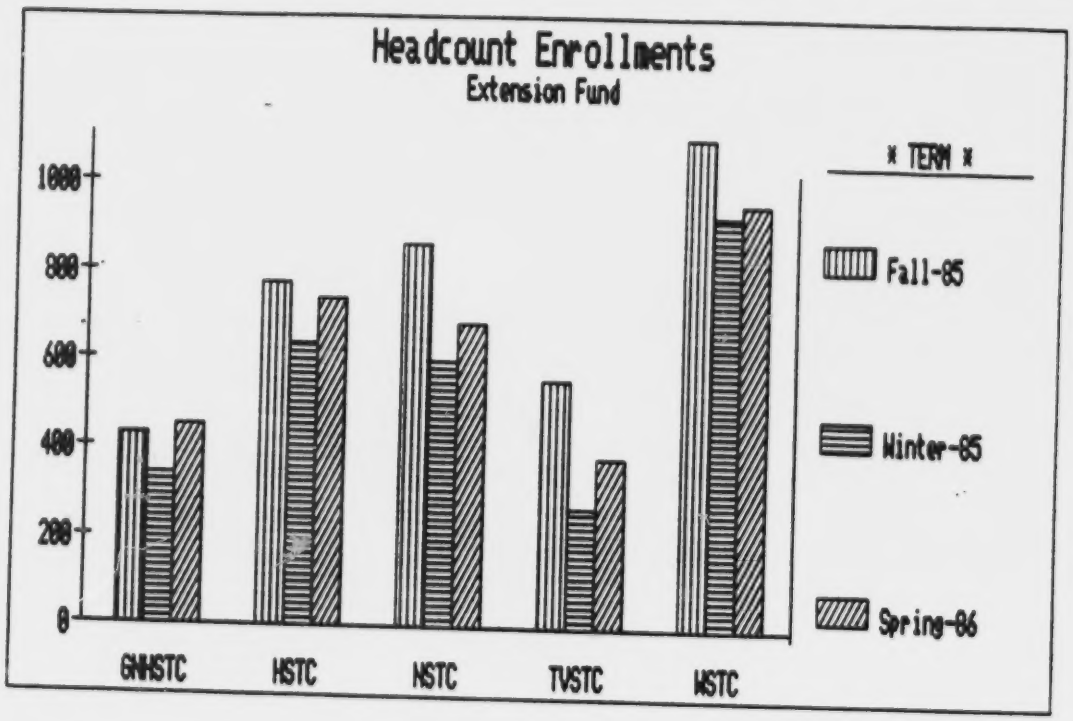

TABLE 2.2

Connecticut State Technical Colleges
Annualized FTE
Extension Fund
1985 - 86 Academic Year

College	1985 Fall	1985 Winter	1986 Spring	1985-86 Annualized
Greater New Haven	127.4	100.7	115.3	114.5
Hartford	252.5	189.9	217.3	219.9
Norwalk	275.1	187.0	209.5	223.9
Thames Valley	154.8	94.3	116.7	121.9
Waterbury	326.1	265.7	274.3	288.7
Totals	1135.9	837.6	933.1	968.9

FTE = credit Hours divided by 15

Annualized FTE = Fall + Winter + Spring divided by 3.
This results in average FTE for 3 quarters.
